Boulevard
DIRECT-VENT LINEAR FIREPLACES

www.empirecomfort.com

With its strong horizontal lines, a Boulevard Linear Direct-Vent Fireplace adds drama to your décor.

The Boulevard Linear Direct-Vent Fireplaces

At up to 34,500-Btu, the heater rated Boulevard Fireplace features a large ceramic glass window (more than 700 sq. in.) that provides excellent heat transfer and contributes to its exceptional efficiency.

Modern Technology, Artfully Applied

Every Boulevard fireplace includes an intuitive multifunction remote control with day-of-week thermostat programming so you can set it to cycle off at bedtime and cycle on in the morning, so you wake to a warm fire.

The Boulevard's Green Earth Preferred Intermittent Pilot system eliminates the standing pilot – saving energy and your money. When you want fire, press the button – or just let the programmable thermostat maintain your desired room temperature. Thanks to its advanced logic, the thermostat remote control anticipates heat demand to minimize temperature fluctuations in the room.

In the event of a power outage, your Boulevard fireplace can operate

with a standing pilot and switch – to provide life-saving warmth for your home until power is restored.

Complete your fireplace installation with one of the surrounds. Each installs in minutes to provide a clean transition from the fireplace to the surrounding wall. Choose a simple 2-inch or 4-inch frame in matte black, or opt for the larger and bolder look of a TideWater front.

Fronts include barrier screens to protect your family from direct contact with the hot glass.

Contemporary or Traditional?

Boulevard Fireplaces are offered in ultra Contemporary and Traditional with a modern twist.

The Contemporary features a linear burner, halogen lighting mounted beneath the burner, and a black porcelain liner. The rich porcelain liner reflects the flames and the lighting. Decorative ceramic glass panels, available as an accessory, add visual interest to the fireplace interior and complement the flames. Use the remote control to raise or lower the lighting levels and the panels glow red along their edges.

Complete your Traditional Boulevard fireplace with one of two distinct accessory log sets (required). The traditional Charred set features meaty oak logs with rough bark, exposed wood and charring.

The Driftwood set is lifted straight from a remote beach with each log worn smooth by wind and waves, and then dried under the hot sun to reveal the rich grain and deep whorls.

The optional variable speed blower, available for Contemporary and Traditional fireplaces, circulates even more warmth into the room.

Both systems are available in LP (31,500 Btu) and Natural Gas (34,500 Btu).

Beautiful, elegant, and efficient . . . your Boulevard fireplace will add value, ambiance, and warmth to your home.

BOULEVARD TRADITIONAL SERIES

DVTL-41-BP90
